"BOOK HAUNT,"
THE
PIONEER BOOKSTORE
OF
NAUGATUCK VALLEY.
FOUNDATION LAID (ON A ROCK) TWENTY YEARS AGO.
Location, BANK STREET,
EXCHANGE PLACE,
WATERBURY, CONN.

This Establishment continues to supply at the LOWEST RATES
everything in its line. It is famed as a BOOKSTORE par excellence,
where Scholars resort for rare and choice copies of Books which are
Books. It is regularly and constantly IMPORTING fine Books to order.
In the line of
SCHOOL BOOKS,
THE HAUNT is especially fortunate and AT HOME—disposing of these
necessaries of life in vast quantities at merely nominal prices. It also
supplies Town and Parish Libraries with STANDARD, SCIENTIFIC,
and MISCELLANEOUS BOOKS on the most favorable terms. The Haunt
is, also, at all times furnished with a good supply of Fine Albums,
Portfolios, Rosewood and Mahogany Portable Writing Desks, Work
Boxes, Dressing Cases, Gold Pans, Sheet Music, Music Instruction Books,
and a variety of FANCY GOODS. Also, the Implements for the Popular
Games of Lawn and Parlor CROQUET, BASEBALL, MARTELLE, &c,
&c. And, THE HAUNT, as a
NEWSPAPER MART,
is transcendentally superior to, and ahead of, any similar establishment in
the entire Commonwealth of Connecticut. More papers, Daily, and
Weekly, are sold at THE HAUNT than are sold at any other concern in
the State. Address:

SILAS BOWDROW LIBRARY
WATERBURY, CONNECTICUT
PREFACE.

We have taken great pains and spared no expense in striving to render our Directory as accurate and complete as possible.

Its record of our City, County, and State Government make it a book invaluable for reference at all times.

Our thanks are due to all for information furnished; but especially to the manufacturing companies and business men who, by the insertion of their cards, have given us that material aid without which we could not have proceeded successfully.

CUMBS FOR BUSINESS MEN.—The Louisville Journal strikingly sets forth the uses of advertising by saying that "we have been carrying on the Louisville Journal between thirty-six and thirty-seven years. During all this time we have known no man of business in this city to fail who advertised liberally. And we have known no one to succeed in any considerable, if even in a respectable degree, who did not advertise liberally."  

The man who pays more for shop rent than for advertising don’t know his business.—Horace Greeley.

### BUSINESS NOTICES, ETC., ETC.

Holmes, Booth & Haydens started in 1835 in the manufacture of general brass goods of small patterns. Their factories are now perfect hives, wherein swarm 500 human bees, whose industry finds outlets in various channels. The capital of the firm is $400,000, and their yearly product amounts to $1,000,000 per year. They have a frontage of 600 feet, covering their rolling-mill and some workshops. Their buildings cover over half an acre, and power is furnished by 3 engines of the combined capacity of 450 horses. One of these (of 350 horse-power) is a Woodruff & Beach pattern. Last year they made 1,800,000 pounds of metal. They also turn out thousands of dozens of kerosene lamp burners every day, in addition to every variety of silver-plated ware. In this latter class of goods their reputation is second to none. In the process of plating every article immersed is weighed on removal from the solution, ensuring an equal deposit of silver on each. They make no hollow ware. This firm use the patent German gasometer, for the manufacture of gas from the residuum of petroleum. The pipes were put through their buildings, and the retort erected at the expense of the American Agent of the invention, Mr. Richter, of Boston, and the result has proved entirely satisfactory. Full and clear gas-light is realized, at a saving of 50 per cent. over that furnished by the city meters. Messrs. Holmes, Booth & Haydens are first to introduce this gas in this country.

Goons Made in Waterbury.—The goods made here comprise cutlery, clocks, iron and steel rollers and machinery, jewelry and its rolls, hosiery, hardware, pins, percussion caps, flasks, brass goods of all kinds, lamps and trimmings, buttons, buckles, hinges, books, paper, boots and shoes, brooms, boxes, cartridges, fire-arms, curtain fixtures, mattresses, yarns, threads, bate, carriage trimmings and hardware, oil burners, collins, confections, cigars, soaps, crackers, daguerreotype plates, mats and preservers, springs, rails, collars, eyelets, escutcheons, furniture, gas burners and pipes, silver-ware, hair pins, hooks and eyes, leather,
locomotive tubes and flues, lamps, models, military ornaments, cloths, nails, reticules, shears, suspenders, wires, carriages, whips and thimbles. What place produces a greater variety of manufactures?

The Scovill Manufacturing Co. makes an attractive and imposing display this year at the Exhibition of the American Institute. Looking at its show-case one would be led to imagine that it had been taxed to the utmost degree to produce such a splendid array of all kinds and qualities of buttons, plain and useful to the highly-ornamental. This is one of the specialties of the Scovill Manufacturing Company. Originally we had to draw the greater part of our button supplies from abroad, chiefly England; but times have changed, and we bid fair to become exporters of this highly useful and universally required article, instead of importers. This is as it should be, as we possess not only the manufacturing talent, but the other capabilities requisite for competing with European producers; for, as far as superior and highly finished goods are concerned, the Scovill Manufacturing Company is certainly well entitled to every praise and commendation, and to carry off from the American Institute a telling testimonial of distinction and merit. Whilst noticing this concern we must not fail to mention that it also manufactures, upon quite an extensive scale, kerosene oil burners, metal blanks of every description, patent pen racks and paper fasteners, as well as all sorts of photographic materials, German silver, brass butt hinges, etc. It is worthy of remark that the company have at their manufacturing a large rolling-mill, which is employed in the rolling out of large sheets of brass and copper as well as silver wire, etc.

Brass, not of that quality so desirable to petty politicians and nomadic Bohemians, commonly called "cheek," but the genuine metal, as made by the Waterbury Brass Co., forms a noticeable item in the manufacturers' column. The Waterbury Brass Company, of which C. H. Carter is president, and J. S. Elton, secretary, and whose main warehouse is 52 Beekman street, New York, is one of the largest concerns in its line in this country. To particularize its productions would be to devote an entire paper to details, each interesting to the general reader. Rolled brass of all descriptions and its assumption of different shapes, tubes, rivets, bars, and sheets, constitute the specialty of their wares, in making which they employ 400 hands. One of their mills is 100 feet square, with wings 100 feet by 35. The other mill is 75 feet by 125, and adjoining wing 80 by 60. This corporation was established in 1845, and last year united with or rather absorbed the American Cap and Flask Company, which makes millions of percussion caps per week. It may interest this sober community to know that here are made elaborate "pocket pistols" so handy to have in one's coat when a lady faints in the cars or a gentleman feels the need of special stimulus for a long trip. The eyelets, too, used in the corsets of females, are here turned out by the thousands of gross. This factory is 45 feet by 200, with a wing 40 by 120 feet.

Brown & Brothers, whose warehouse is at 33 Beekman street, New York, are keeping 250 men busy in the production of brass, in the shape of pivots, rivets, wires, basins, etc. C. W. Minard's patent smooth-rolled brass and copper kettles are a specialty here. They have been established sixteen years, and their rolling-mill is a model of convenience and architectural design. Their capacity is 1,800,000 pounds of brass per year in ordinarily good business times.

The Farrell Foundry and Machine Co. make at Waterbury and Ansonia all classes of rolling-mill machinery, of which chilled rolls are a special item. Rubber machines, heavy gearing, presses, and the various parts necessary to mill equipment, are among their more prominent products, on which 125 hands are engaged.

It may be an item of interest to people who are continually "button-holing" each other, to know that the Waterbury Button Company make every variety of buttons, of all qualities. They furnish our State military and municipal police, and turn out 3,000 gross per week. Seventy hands are now engaged here, thirty less than the maximum complement.

The Benedict & Burnham Manufacturing Co. make high and low brass, gilding metals, tubes, castings, wires, bars, rivets, and plain and fancy designs of rolled pipes. The concern started in 1842, employs 125 hands, and make 125,000 pounds of metal per month. Their power is from both steam and water. Aaron Benedict is president, Chas. Benedict, treasurer, and Chas. Dickerson, secretary.

The American Pin Company are now employing 90 hands, and well may one inquire, "Where do all the pins
BUSINESS NOTICES.

go it for this establishment turns out 16,500 papers per day. They are running 70 machines of their own design, and are full of orders. Mr. Driggs remains in the Agent's chair, and Mr. Irving H. Coe is his gentlemanly clerk.

Bjorke & Johnson is the name of a thriving corporation, now employing 25 hands in the general manufacture of machinery. Hardened cast-steel rolls, plain or engraved, are prominent among their products, which also embrace ladies' hair-pins, rivets, etc.

The Great Brook Co., formerly Whittal, Le Fevre & Co., employ 200 hands and run 50 looms on fine cloaks of very fancy patterns. They make 4,000 yards per week.

J. W. Whittal is President.

The American Suspender Company have been established 10 years. They employ 300 hands in their factory, and 1,000 stitchers outside, making all styles of elastic tapes and webs. Last year their products amounted to half a million dollars in value.

The City Manufacturing Co. have had 10 years' experience in the manufacture of general brass work. They employ 125 hands, and make a specialty of lamps and lanterns.

The Waterbury Buckle Co. make every variety of vest, pantaloons, suspender, shoe, belt and skirt buckles and general brass trimmings. They employ 200 hands, and for 15 years have been in the business.

The Carrington Manufacturing Co., engaged in the manufacture of saddlery and carriage hardware, employ now 80 hands—but half their quota.

The Sevill Manufacturing Company have 375 hands at work upon buttons, and their usual line of small brass goods.

The American Cap and Flask Co. has been absorbed by the Waterbury Brass Co.

The taxable value of manufacturing property in Waterbury, is nearly $2,000,000.

White & Wells employ 30 hands, making from 3,000 to 6,000 boxes per day, according to size.
