TYPE-METAL RELIEF PLATES.
A SUPERIOR SUBSTITUTE FOR WOOD-CUTS
AT MUCH LOWER PRICES.

These plates are exposed almost entirely by photo-chemical means, then washed and dried, then silvered with an enameling substance. Each line is separately by cutting away the wood around it, often operated by the use of a knife, which is inserted between the two toning papers. In appearance, our relief plates are the same as regular stereotype, being wrought in a block ready to be set up and printed from, with type, by any ordinary press.

They can be used directly and will wear as long as any stereotype plate, but if a great number of impressions are wanted, duplicated.

ELECTROTYPE AND STEREOTYPE PLATES
are made from these same as from wood-cut.
They have a printing surface as smooth as plate, and the lines are engraved deeper than they are in hardwood plates. Notwithstanding the deepness at which they can be ground out, they are very much cheaper to work on, and in some classes of work are rapidly taking the place of lithography.

REFERENCES.

COPY.
Almost all kinds of Prices or Engravings from Wood, Stone, Copper and Steel may be reproduced directly. Therapeutics, even, distinct black lines or stipple work, on white or only slightly colored paper. All Engravings and Paper Blocks must first be drawn in ink. We keep a corps of artists constantly employed, trained to do this work in the best manner. We can make a drawing from photograph or typescript taken in the usual way. They may be of any size, but should, of course, show the object distinctly. Drawings for our use, unless intended to be returned, should be on a smooth white paper, in a neatly traced line, and usually over the direction of the drilled plate.

COPY for facsimiles of handwriting should be in perfect black, on smooth white paper, written with a full pen, and without use of lifting paper.

TIME.
While we can engrave a plate a day that would occupy a wood-engraver a month, and often do so, yet with the large amount of work we are accustomed to do in our line, we endeavor to hold our prices as low as possible. We have about two plate on hand, and we can turn out a single plate a day, and have had larger orders of if, of course, require longer time.

CHARGE OF HE.
In reproducing wood-cut prints, the size can often be considerably reduced. In many instances, the lines become thinner and closer together so that they will not print well. Cause wood-cuts, such as are generally used in newspapers, may often be reduced in size to a point where the picture becomes almost invisible, but, after wood-cuts will add of but slight advantage.
